

# PS1

## About

PS1 is a very maneuverable pallet fork that makes it easy to move your pallets and that can be used with MiRHook. With the MiRHook integration you can now automate your internal pallet transport. It is fast and simple and you do not need to invest in other equipment or make changes in your production.

- Very user-friendly and can be loaded by a normal pallet jacket
- Simple to set-up
- Braked when it is empty, which makes it easier to place pallets
- Minimal service required
- Fast ROI

## Specifications

Pallet sizes: 120 x 80 and 80 x 40 cm  
Capacity: 500 kg (with MiRHook200)  
Compliant with MIR robots
